

Product Line Guide

North Coast Bearings markets and distributes differential rebuild kits, transmission rebuild kits and related products to the heavy, medium and light duty aftermarkets under the DT Components[®] product line. The brand was created through a strategic alliance with The Timken Company.

Over 2,500 Different Rebuild Kits

Our continually growing product line includes rebuild kits for the broadest range of on highway vehicles along with complementing gearing, axle shafts, u-joints and related products. Please visit our website for the latest news, information and literature on all of the North Coast Bearings products.

DT Components is the most recognized and respected brand of differential and transmission rebuild kits in North America. Our mission is to provide the best value in differential and transmission kits and components. Best value means Timken[®] tapered roller bearings, the best order fill, the fastest in-house turn-around time, US manufacturers' product where available, superior quality and personalized service.

North Coast Bearings is a member of the Bearingtech family of companies. These include:

- Bearing Technologies – Engineers and manufactures OEM quality wheel end products and OEM center support bearings,
- Micron Metalworks – Machining division for automotive wheel end products,
- Precision – Provider of competitively priced line of quality hub assemblies, bearings, seals and related products to automotive warehouse distributors.

North Coast Bearings services our customers from our 110,000 square foot Avon, Ohio facility along with a distribution center in Sparks, Nevada. The DT Components brand of kits are also available from additional Timken distribution centers throughout the world.

DT Components Web Site

The redesigned and more informative DT Components web site contains product information, literature, customer login, and a link to our web catalog.
