Eaton-Fuller Transmissions Overhaul Rebuild Kits

The DT Components product line has expanded to include overhaul rebuild kits for Eaton-Fuller transmissions. The overhaul rebuild kits contain all of the bearings, seals, snap rings and gaskets found in the DT Components standard kits along with the applicable input shaft, sliding clutch, connectors and collets necessary to complete the rebuild.

These kits provide rebuilders a superior value by upgrading the DT Components standard rebuild kit with an OE quality input shaft and sliding clutch in one convenient package. Please contact your sales representative for pricing information.
